PSYCHOMETRIKA—VOL. 40, NO. 4
DECEMBER, 1975

INDEX FOR VOLUME 40

Abrahams, Norman M. (see Alf, Edward F. Jr.)
Alf, Edward F. Jr. and Abrahams, Norman M. The use of extreme groups in assessing relationships. 563–572.
Arnold, J. C. (see Hamdan, M. A.)
Arri, P. S. (see Nishisato, Shizuhiko)
Brown, Morton B. The asymptotic standard errors of some estimates of uncertainty in the two-way contingency table. 291–296.
Christofferson, Anders. Factor analysis of dichotomized variables. 5–32.
Coombs, Clyde H. (see McClelland, Gary)
Cureton, Edward E. and Mulaik, Stanley A. The weighted varimax rotation and the promax rotation. 183–195.
Feldt, Leonard S. Estimation of the reliability of a test divided into two parts of unequal length. 557–561.
Fienberg, Stephen E. and Lee, S. Keith. On small world statistics. 219–228.
Flammer, A. A conceptual model relating transfer of learning and correlation. 487–503.
Gleason, John R. and Halperin, Silas. A paired compositions model for round-robin experiments. 433–454.
Gower, J. C. Generalized procrustes analysis. 33–51.
Haden, Richard L. and Schulman, Robert S. A test theory model for ordinal measurements. 455–472.
Halperin, Silas (see Gleason, John R.)
Hamdan, M. A., Pirie, W. R., and Arnold, J. C. Simultaneous testing of McNemar's problem for several populations. 153–161.
Heath, R. A. (see Link, S. W.)
Hettmansperger, Thomas P. Non-parametric inference for ordered alternatives in a randomized block design. 53–62.
Hubert, Lawrence (see Pandey, Tej N.)
Johnson, Richard M. A simple method for pairwise monotone regression. 163–168.
Kearns, Jack and Meredith, William. Methods for evaluating empirical Bayes point estimates of latent trait scores. 373–394.
Korth, Bruce and Tucker, Ledyard R. The distribution of chance congruence coefficients from simulated data. 361–372.
Kraemer, Helena C. On estimation and hypothesis testing problems for correlation coefficients. 473–485.
Lee, S. Keith. (see Fienberg, Stephen E.)
Levy, Kenneth J. An empirical comparison of the z-variance and Box–Scheffe tests for homogeneity of variance. 519–524.
Lewis, Charles, Wang, Ming-mei, and Novick, Melvin R. Marginal distributions for the estimation of proportions in m groups. 63–75.
Link, S. W. and Heath, R. A. A sequential theory of psychological discrimination. 77–105.
Lord, Frederic M. The 'ability' scale in item characteristic curve theory. 205–217.
Lund, Thorleif. Comments on Micko's "halo"-model for multidimensional ratio scaling. 549–555.
Martin, J. K. (see McDonald, Roderick P. and Martin, J. K.)
McClelland, Gary and Coombs, Clyde H. ORDMET: A general algorithm for constructing all numerical solutions to ordered metric structures. 269–290.

McDonald, Roderick P. and Martin, J. K. Bayesian estimation in unrestricted factor analysis: A treatment for Heywood cases. 505–517.
McDonald, Roderick P. Descriptive axioms for common factor theory, image theory and component theory. 137–152.
Meredith, William (see Kearns, Jack)
Mulaik, Stanley A. (see Cureton, Edward E.)
Nicewander, W. Alan. A relationship between Harris factors and Guttman's sixth lower bound to reliability. 197–203.
Nishisato, Shizuhiko and Arri, P. S. Nonlinear programming approach to optimal scaling of partially ordered categories. 525–548.
Novick, Melvin R. (see Lewis, Charles)
Pandey, Tej N. and Hubert, Lawrence. An empirical comparison of several interval estimation procedures for coefficient alpha. 169–181.
Peay, Edmund R. Nonmetric grouping: Clusters and cliques. 297–313.
Pirie, W. R. (see Hamdan, M. A.)
Ramsay, J. O. Solving implicit equations in psychometric data analysis. 337–360.
Schulman, Robert S. (see Haden, Richard L.)
Staelin, Richard (see Gleason, Terry C.)
Swain, A. J. A class of factor analysis estimation procedures with common asymptotic sampling properties. 315–335.
Thomas, Ewart A. C. A note on the sequential probability ratio test. 107–111.
Tucker, Ledyard R (see Korth, Bruce)
Wang, Ming-mei (see Lewis, Charles)
Zimmerman, Donald W. Probability spaces, Hilbert spaces, and the axioms of test theory. 395–412.

Notes and Comments

Arnold, Barry. Significant category clustering in free recall. 571–581.
Baker, Robert F. (see Young, Forrest W.)
Coombs, Clyde H. A note on the relation between the vector model and the unfolding model for preferences. 115–116.
Huynh, Huynh. On canonical analysis with fallible data. 575–577.
Levy, Kenneth J. Selecting the best population from among K binomial populations or the population with the largest correlation coefficient from among K bivariate normal populations. 121–122.
McDonald, Roderick P. A note on Rippi's test of significance in common factor analysis. 117–119.
McDonald, Roderick P. Testing pattern hypotheses for correlation matrices. 253–255.
Peay, Edmund R. Grouping by cliques for directed relationships. 573–574.
Thissen, David (see Wainer, Howard)
Wainer, Howard and Thissen, David. When jackknifing fails (or does it?). 113–114.
Young, Forrest W. and Baker, Robert F. A note on an empirical evaluation of the ISIS procedure. 413–415.

Reviews

Baker, Frank B. Review of *The Psychology of Computer Programming* by Gerald M. Weinberg. 123.
Bloxom, Bruce. Review of *A First Course in Factor Analysis* by Andrew L. Comrey. 263.
Bolton, Brian. Review of *New Approaches to Personality Classification* by Alvin R. Mahrer (Editor). 130–132.

Bolton, Brian. Review of *Personality Assessment* by Richard I. Lanyon and Leonard D. Goodstein. 128–130.

Bolton, Brian. Review of *The Measurement of Personality Traits by Scales and Inventories* by Allen L. Edwards. 127–128.

Cramer, Elliot M. Review of *Multiple Classification Analysis: A report on a computer program for multiple regression using categorical predictors* by Frank Andrews, James Morgan, and John Sonquist. 265.

Cramer, Elliot M. Review of *Searching for Structure (Alias-AID-III)* by John Sonquist, Elizabeth Baker and James Morgan. 263–265.

Cramer, Elliot M. Review of *The Detection of Interaction Effects: A report on a computer program for the selection of optimal combinations of explanatory variables* by John A. Sonquist and James N. Morgan. 266.

Crano, William D. Review of *Psychological Modeling: Conflicting Theories* by Albert Bandura. 123–124.

McDonald, R. P. Review of *Introduction to Linear Models* by J. H. Ward and E. Jennings. 132–133.

Posavac, Emil. Review of *Research on Human Behavior: A Systematic Guide to Method* by P. J. Runkel and J. E. McGrath, 133–134.

Ramsay, J. O. Review of *Foundations of Measurement, Volume* 1 by David H. Krantz, R. Duncan Luce, Patrick Suppes, and Amos Tversky. 257–262.

Thorndike, Robert M. Review of *A Bibliography of Multivariate Statistical Analysis (ABOMSA)* by T. W. Anderson, Somesh Das Gupta and George P. H. Styan. 125–127.
